Henнге
Tokyo, Japan

Senior Front-End Engineer (React)

Dear Hiring Manager,

I am expressing my interest in the Senior Front-End Engineer (React) position at HENNGE. With a solid background in web development, particularly in React and TypeScript, I am truly interested in joining your team in Tokyo.

In my current role as Software Developer at Prospectum Oy, I have honed my skills in designing, developing, and maintaining robust features aligned with the company's business requirements. Leveraging React, TypeScript, PHP, and Laravel, I have successfully designed and developed our customer needs in a form of large-scale event management software. Furthermore, being an entrepreneur and co-founder of a software company myself, I can align my thoughts and focus in a way that they support the required business models.

I am well-versed in your specified tech stack, having around 3 years experience in almost every tool this job requires. Because of this, I am sure my skillset and experience as a frontend developer would be valuable to your company.

As a person, I am sure to fit into the team. I am energetic, positive, and always ready to help when needed. On my free time, I do a lot of sports, including xc-skiing, gym, padel, and badminton.

Thank you for considering my application. I look forward to the possibility of contributing to HENNGE's innovative endeavors. Available to work within a few months notice, I look forward to sharing my perspectives on the position and arranging a meeting at your earliest convenience.

Sincerely,

Henri Willman
